Front-End Software Engineer

Eager, front-end software engineer with a passion for finding new answers to old questions and expressing my creativity by developing websites and web applications, using the latest technologies.

SKILLS

Languages:

- JavaScript (ES6+), HTML, CSS/SASS

Frameworks & Libraries:

- React, jQuery, Tailwind CSS, Bootstrap, React-Bootstrap, Styled Components, Material UI

Tools & Platforms:

- NPM, Webpack, Git, Command Line, Git Bash, Chrome DevTools, ESLint, Babel JS, Prettier, Github, Firebase, Contentful, Netlify, WordPress

Design:

- Adobe Lightroom, Adobe Photoshop, Adobe XD, wireframing, responsive design, cross-browser compatibility

Other:

- SEO coding best practices, Understanding of HTTP, AJAX, JSON, REST, CRUD, Web Accessibility (A11y), Semantic HTML, Full WCAG/ADA compliance

EXPERIENCE

Front-End Software Engineer

July 2020 - PRESENT

Personal Portfolio (<https://www.nicolisyuvienco.dev/>)

- Performed SEO on my personal website and made it to the first page of results on Google when you search my name. Built with HTML, Bootstrap, and JavaScript.
- Implemented best web accessibility practices, such as including alt attributes on all image elements, to conform to WCAG standards and to ensure all content is ADA compliant.

Doer (<https://doer.netlify.app/>)

- Designed and built a productivity web application to help users stay focused and on task. Increased user productivity by roughly 40%. Built with HTML, CSS, and JavaScript.
- Implemented state management by using the Web Storage API to store user name, notes, todo-list, and pomodoro timer state.
- Developed features in JavaScript to display the local time, date, and weather by using the Geolocation API and Openweather API.

Wheels Landing Page (<https://wheelslandingpage.netlify.app/>)

- Developed a landing page for the Wheels ridesharing company. Built with HTML, SASS, JavaScript, Splide JS, US Restaurant Menus API, and Webpack.
- Implemented client side form validation with vanilla JavaScript and also form handling asynchronous JavaScript and the Fetch API.
- Incorporated ES Modules in the code base to organize and separate code chunks by functionality, which increased readability and helped keep the code base DRY.

Felix's Footwear (<https://ecommerce-yuvi.netlify.app/>)

- Created an e-commerce website for Felix's Footwear shoe company using a headless CMS to display product data. Built with HTML, Tailwind CSS, JavaScript, Splide JS, Body Scroll Lock, Contentful CMS, and Webpack.
- Implemented Object-Oriented programming in JavaScript by using classes and methods.
- Included Webpack as my build tool of choice to transpile, bundle, and optimize ES Modules for production.

EDUCATION

California State University, Long Beach

Bachelor of Arts, Geography with a concentration in Geographic Information Systems

- Experienced programming with Java for the first time in a CS introductory course.

Leadership & Achievements

- President's List @ CSULB - Spring 2020
- Percussion section leader for Gold Drum & Bugle Corps

HOBBIES

In my free time I enjoy surfing, hiking, drumming, and playing with my cat.
